- Shopify, Wordpress (Woocommerce), Lightspeed eCommerce
- Optimisation of assets
- API Research and implementation
- Bootstrap & Foundation Frameworks
- Meet face to face with clients to work live on their website

## Job Achievements To Date

I recently went to the eCommerce Expo in London (<https://www.ecommerceexpo.co.uk/>) to operate a stand and increase brand awareness for the company we partner with. I was tasked with talking to industry experts for two days speaking highly of the system and answering any questions clients had.

I recently had the opportunity to organise and conduct a 4 hour session with clients. This involved the client meeting at our office where I liaised with them making live edits to their website as well as using my initiative to answer any questions they had.

## Completed Projects At Flair - BigCommerce Platform

- <https://www.thebrilliantbakers.co.uk/> - Bespoke Project
- <https://www.tjcollection.com/> - Bespoke Project
- <http://www.eclisse.co.uk/> - Bespoke Project  
(<http://www.eclisse.co.uk/flush-glass-pocket-door-patterned/> - contains a custom door slider module)
